DETAILED ACTION

1. New claims 45-46 have been added. *Claims 1-46 are pending.* No drawings were filed with the application.

Election/Restrictions

2. The restriction of record has been replaced with the following:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17, 42 (in part) and 18-41, 43-46, drawn to compounds where R is formula (a) and (b), classified in class 560, subclass 1+.
- II. Claims 1-17, 42 (in part), drawn to compounds where R is formula (c), (d) (f), classified in class 549, subclass 200+.
- III. Claims 1-17, 42 (in part), drawn to compounds where R is formula (e), classified in class 546, subclass 1+.

In accordance with the decisions in *In re Harnisch*, 631 F.2d 716, 206 USPQ 300 (CCPA 1980); and *Ex parte Hozumi*, 3 USPQ2d 1059 (Bd. Pat. App. & Int. 1984), restriction of a Markush group is proper where the compounds within the group either (1) do not share a common utility, or (2) do not share a substantial structural feature disclosed as being essential to that utility. In addition, a Markush group may encompass a plurality of independent and distinct inventions where two or more members are so unrelated and diverse that a prior art reference anticipating the claim with respect to one of the members would not render the other member(s) obvious under 35 U.S.C. 103.

The inventions are distinct, each from the other because of the following reasons:

Each of Groups I, II and III are distinct and independent, one from the

Art Unit: 1625

other on the basis of structure defined in the claimed inventions as directed to an compound where R is (a) and (b); (c), (d) and (f); and (e) respectively. Absent factual evidence to the contrary, each is a different chemical compound.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

3. Applicant's election with traverse of Group I, claims 1-17 and 42 species of compound 21a in the reply filed on September 7, 2004 is acknowledged. The traversal is on the ground(s) that the search directed to the entire subject matter of the claims would not be unduly burdensome. This is not found persuasive because the species of each group differ in elements, chemical structure and properties to such an extent that a reference anticipating one group would not render another group obvious and the searches for each group with different core would not be co-extensive of each other.

Based on the above election the following will be examined -- compounds of the

Formula 1

where R is formula (a) and (b) below

; R1/R2/R3/R4/R5/R6 R7/R8 are as

defined in claim 1; m/n/o are as defined in claim 1.

Claims 1-13 and 18-46 have been examined based on the above election.

Claims 14-17 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Applicant timely traversed the restriction (election) requirement in the reply filed on September 7, 2004.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Ex parte Quayle

5. This application is in condition for allowance except for the following formal matters:

The presence of nonelected invention.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.
